Hallawell's Fragrant GIANT HYACINTHS

for GARDEN and
INDOOR BLOOM

*Extra Size Bulbs for
garden or indoor cul-
ture where the larg-
est spikes of flowers
are desired.*

Hyacinths are unsurpassed for beauty and fragrance in the early spring and they are one of the most popular flowers for growing in pots or hyacinth glasses for indoor bloom. They are superb for show in the garden where they may be grown in beds, borders, or in groups of one color planted here and there among perennials or shrubs. Plant the bulbs 6 to 7 inches deep and about 7 inches apart. Bulbs may be left in the ground.

Pot Culture—Use only the extra size hyacinth bulbs for pot or water culture. For pot plants put 1 bulb in a six-inch pot or several bulbs in a larger pot.

City of Haarlem—Best yellow.

Indigo King—Deep violet purple.

La Victoire—Glistening carmine red.

HYACINTH GLASS CULTURE

Fill the glass with water to almost the base of the bulb. Water evaporation will moisten the tiny root points and set them in action. Keep the glass in a cool, dark place, on the cold floor, covered with a box to keep them dark. Add water occasionally to keep glass filled. Do not bring them to light and warmth until the flower buds are 3 inches above the bulb, or you will be disappointed.

Rainbow Mixture Gladiolus

(Medium size bulbs)

Includes many choice gladiolus of all colors. The bulbs are medium size and if planted close together will make a colorful show in mass plantings.

Medium Size Bulbs—12 for 75c,

50 for \$3.00, 100 for \$5.50

GLADIOLUS CULTURE—Our large No. 1 gladiolus will produce sturdy exhibition spikes 3 to 5 feet tall with many large perfect flowers. Plant 4 inches deep, 6 inches apart, in full sun if possible. Dig in fertilizer at time of planting and give a surface application when 1 foot high. Spray with Pest-B-Gon to prevent thrips and earwigs. When foliage is yellowed, dig and store the bulbs in a dry place, dust them with Gladiolus Dust to prevent insect infestation during storage.

Baby Glads

In California we plant these during the fall months for early spring bloom; in more severe climates the bulbs may be kept in a cool place until spring as other gladiolus. They bloom early and make good cut flowers. The bulbs multiply. Plant 3 inches deep, 4 inches apart.

Amanda May—Large deep salmon.

Peach Blossom—Blush pink blotched rose and cream.

Spit Fire—Brilliant scarlet.

The Bride—Large pure white.

RANUNCULUS

I had the most gorgeous
blooms from your RANUNCULUS this spring.

Mrs. H. M., Nevada

The Finest strain of RANUNCULUS in existence

Large wavy petaled flowers with perfect form, developed in the most desirable shades of red through yellow, orange, and pink to white.

The branching plants grow 18 to 24 inches high producing a succession of fine long stemmed flowers for colorful garden display and for cutting.

In mild climates plant during fall and winter months; cold climates in the spring. Set Jumbo bulbs one foot apart each way and 2 inches deep, claws pointed downward. Set medium bulbs 6 to 8 inches apart.

In heavy wet soil protect the bulbs with coarse sand. To prevent bird damage, start bulbs in flats of loose soil and transplant when they have tops.

HYBRID MIXTURE—Jumbo bulbs for exhibition flowers.
12 for \$1.50, 50 for \$6.00, 100 for \$11.00

HYBRID MIXTURE—Medium size bulbs.
